

Energy performance certificate (EPC)

| | | |
|--|---------------------------|---|
| 22, Mortimer Gardens TADLEY RG26 3UP | Energy rating D | Valid until: 9 August 2029 |
| | | Certificate number: 0618-2065-6248-7541-4960 |

| | |
|------------------|-------------------|
| Property type | Ground-floor flat |
| Total floor area | 27 square metres |

Rules on letting this property

Properties can be let if they have an energy rating from A to E.

You can read [guidance for landlords on the regulations and exemptions \(https://www.gov.uk/guidance/domestic-private-rented-property-minimum-energy-efficiency-standard-landlord-guidance\)](https://www.gov.uk/guidance/domestic-private-rented-property-minimum-energy-efficiency-standard-landlord-guidance).

Energy rating and score

This property's energy rating is D. It has the potential to be C.

[See how to improve this property's energy efficiency.](#)

The graph shows this property's current and potential energy rating.

Properties get a rating from A (best) to G (worst) and a score. The better the rating and score, the lower your energy bills are likely to be.

For properties in England and Wales:

- the average energy rating is D
- the average energy score is 60

Breakdown of property's energy performance

Features in this property

Features get a rating from very good to very poor, based on how energy efficient they are. Ratings are not based on how well features work or their condition.

Assumed ratings are based on the property's age and type. They are used for features the assessor could not inspect.

| Feature | Description | Rating |
|----------------------|---|-----------|
| Wall | Timber frame, as built, insulated (assumed) | Good |
| Window | Fully double glazed | Good |
| Main heating | Room heaters, electric | Very poor |
| Main heating control | Appliance thermostats | Good |

| Feature | Description | Rating |
|-------------------|---|---------|
| Hot water | Electric immersion, off-peak | Poor |
| Lighting | Low energy lighting in 40% of fixed outlets | Average |
| Roof | (another dwelling above) | N/A |
| Floor | Solid, no insulation (assumed) | N/A |
| Secondary heating | None | N/A |

Primary energy use

The primary energy use for this property per year is 477 kilowatt hours per square metre (kWh/m²).

▶ [About primary energy use](#)

Primary energy use is a measure of the energy required for lighting, heating and hot water in a property. The calculation includes:

- the efficiency of the property's heating system
- power station efficiency for electricity
- the energy used to produce the fuel and deliver it to the property

How this affects your energy bills

An average household would need to spend **£572 per year on heating, hot water and lighting** in this property. These costs usually make up the majority of your energy bills.

You could **save £222 per year** if you complete the suggested steps for improving this property's energy rating.

This is **based on average costs in 2019** when this EPC was created. People living at the property may use different amounts of energy for heating, hot water and lighting.

Heating this property

Estimated energy needed in this property is:

- 2,469 kWh per year for heating
- 1,454 kWh per year for hot water

Impact on the environment

This property's environmental impact rating is D. It has the potential to be D.

Properties get a rating from A (best) to G (worst) on how much carbon dioxide (CO₂) they produce each year.

Carbon emissions

| | |
|--------------------------------------|-----------------------------|
| An average household produces | 6 tonnes of CO ₂ |
|--------------------------------------|-----------------------------|

| | |
|-------------------------------|-------------------------------|
| This property produces | 2.2 tonnes of CO ₂ |
|-------------------------------|-------------------------------|

| | |
|---|-------------------------------|
| This property's potential production | 1.8 tonnes of CO ₂ |
|---|-------------------------------|

You could improve this property's CO₂ emissions by making the suggested changes. This will help to protect the environment.

These ratings are based on assumptions about average occupancy and energy use. People living at the property may use different amounts of energy.

Steps you could take to save energy

▶ [Do I need to follow these steps in order?](#)

Yes. Each step builds on the one before it so you can save the most energy.

For example, it's more energy efficient to insulate your home before you buy a new boiler. A well insulated home will lose less heat so you do not have to run your boiler as often.

Step 1: Floor insulation (solid floor)

| | |
|--|--|
| Typical installation cost | £4,000 - £6,000 |
| Typical yearly saving | £104 |
| Potential rating after completing step 1 |  69 C |

Step 2: Low energy lighting

| | |
|---|--|
| Typical installation cost | £15 |
| Typical yearly saving | £10 |
| Potential rating after completing steps 1 and 2 |  70 C |

Step 3: High heat retention storage heaters and dual rate meter

| | |
|--|--|
| Typical installation cost | £400 - £600 |
| Typical yearly saving | £108 |
| Potential rating after completing steps 1 to 3 |  78 C |

Who to contact about this certificate

Contacting the assessor

If you're unhappy about your property's energy assessment or certificate, you can complain to the assessor who created it.

| | |
|------------------------|--|
| Assessor's name | Paula Bamford |
| Telephone | 07970743507 |
| Email | paulabamford25@gmail.com |

Contacting the accreditation scheme

If you're still unhappy after contacting the assessor, you should contact the assessor's accreditation scheme.

| | |
|-----------------------------|--|
| Accreditation scheme | Elmhurst Energy Systems Ltd |
| Assessor's ID | EES/022958 |
| Telephone | 01455 883 250 |
| Email | enquiries@elmhurstenergy.co.uk |

About this assessment

| | |
|-------------------------------|------------------|
| Assessor's declaration | No related party |
| Date of assessment | 9 August 2019 |

Date of certificate10 August 2019

Type of assessment▶ [RdSAP](#)

RdSAP (Reduced data Standard Assessment Procedure) is a method used to assess and compare the energy and environmental performance of properties in the UK. It uses a site visit and survey of the property to calculate energy performance.

This type of assessment can be carried out on properties built before 1 April 2008 in England and Wales, and 30 September 2008 in Northern Ireland. It can also be used for newer properties, as long as they have a previous SAP assessment, which uses detailed information about the property's construction to calculate energy performance.

Other certificates for this property

If you are aware of previous certificates for this property and they are not listed here, please contact us at mhclg.digital-services@communities.gov.uk or call our helpdesk on 020 3829 0748 (Monday to Friday, 9am to 5pm).
